

FLOWERAURA

CUSTOMER SENTIMENT ANALYSIS

(BY USING PYTHON & ITS LIBRARIES)

PROJECT OVERVIEW

Data Collection

Scrapped 450+ reviews from the website of FlowerAura using Selenium and BeautifulSoup

Data Manipulation

Removed duplicates, special characters, stopwords, tokenized & more

Sentiment Analysis

TextBlob polarity scoring Positive (≥ 0.1) or Negative (< 0.1)

Data Visualization

Charts, Word clouds & Insights using Matplotlib and Seaborn

- This project is about analyzing customer reviews to understand public sentiment towards a product
- The product is a ten flower bouquet
- By processing and classifying reviews as positive or negative, it helps businesses make data-driven decisions to improve customer experience and product quality
